DRINKING CUPS

Choose the correct region version

The SUPD requires all hot cups and cold cups to display a marking, which details whether there is plastic in the product or the product is made from plastic. The materials we use haven't changed, our PLA lined hot cups are still compostable and our cold cups are still made from PLA. The marking must be displayed with text in the official language of the member state where the product will be sold to end users.

Therefore we have introduced three designs to cover the member states in which we operate, a map of the regions and corresponding language is on this page. The suffix (last letter) of each code represents the region A, B or C.
